/ Increase of provision on non-performing loans: EUR 63 M (vs increase of EUR 31M in 2023)

- Increase of EUR 5M on dealers (decrease of EUR 5M in 2023): mainly due to the entry in default of a

- Increase of EUR 58M on Retail financing, of which increase of EUR 36M in provisions on exposures (compared to EUR 55M) and increase of expertise provisions (EUR 23M compared to a net release of EUR 22M) variation mainly explained by Colombia where positive adjustments in 2023 linked to a methodology's bias were allocated to statistical ECL in 2024.

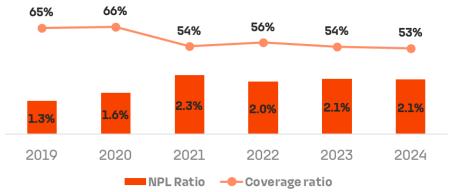

Decrease of provision on performing loans: EUR 38 M (decrease of EUR 14M in 2023)

- Dealer financing : EUR 7M increase in provisions (explained mainly by the evolution of Forward Looking and by a volume effect considering the increase in outstanding of EUR 2 bn (decrease of provision of EUR 5M in 2023)
- Customer financing (private customers and fleets): EUR -45 M decrease of provision (EUR 8M decrease in 2023) explained by the outstanding rise (EUR 38M in 2023), offset by a reversal of EUR 36M explained by a Mix & Parameters effect, a net release on expertise provisions of EUR 30M driven by the Inflation risk disappearance & a net release on Forward Looking of EUR 3M

- Weaknesses : «RCI's risk profile remains high mainly because of its captive status and lack of business diversification; the car market is cyclical; the bank has some credit concentration vis-a-vis car dealers; exposure to residual value risk is increasing; The bank relies on wholesale funding to a significant degree.»

Operational risk

- RCI is committed to maintaining sound buffers over requirements
- High profitability business allows RCI to generate on a standalone basis the CET1 capital needed to deliver on its growth strategy
- "Basel IV" output floor is expected to have no impact

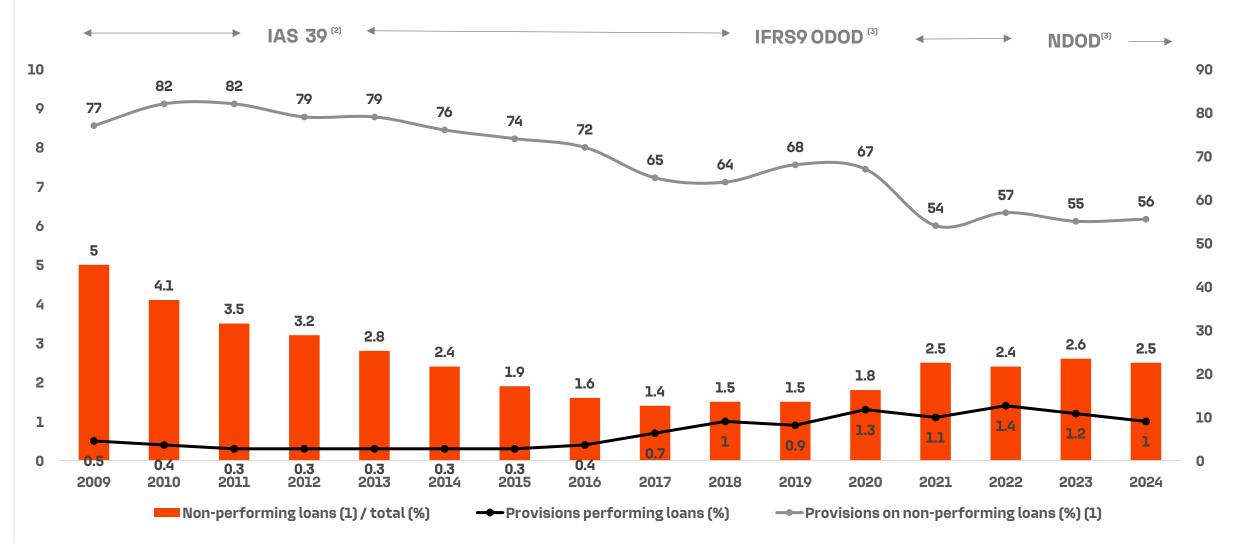

⁽¹⁾ The changes in the CET1 ratio are mainly due to a rise in Risk Exposure Amount (+€3,246m) related mainly to a higher credit risk on wholesale (+€1,360m), on retail customers (+€1,201m) and on other assets not corresponding to credit obligations (+€973m). This rise is partially offset by high CET1 (+€504m) due to the integration of the annual result excluding forecasted dividend (+€802m), to the increase in intangibles cancellation (-€119m), in goodwill cancellation (-€155m), and in differences EL/PROV (-€55m).
